Profile

A Software Engineer with Exceptional Expertise in frontend technologies such as React.js, Next.js, and JavaScript.

Total Experience :

I have 2 years of Total experience.

Experience

Software Engineer, Redcliffe Lifetech Pvt. Ltd. , Noida

JUNE 2022 – SEPTEMBER 2023

- As a Software Engineer played a vital role in Migration from **React.js** to **Next.js** changes in web pages. Developed highly responsive and productive web pages according to given challenges and requirements.
- Worked on **crysta IVF project**, developed all new city pages and Fertility Experts web pages dynamically and handled the project very effectively.
- Developed a **search bar effect** which is continuously running dynamically and **Recommendation web page** for suggesting the health package according to you selected options.
- Developed a robust **search** and **near me lab feature**, reduced API call requests through **Abort Controller**. Additionally, I created a smooth **infinite scroll feature** with shimmer loading effects for a seamless user experience.
- Learned new things with full enthusiasm and **Agile methodology**, to manage the all code using **version control Github**, **Postman for APIs collaboration** and work record with **Atlassian Jira Software** and **Slack**. Implemented **GA tags** and **Moengage events** across the website to track user activities.

Magento developer, Chetu, Noida

MARCH 2022 – JUNE 2022

- Learned about **Magento framework** Using **PHP** and **Javascript** for creating the **E-COMMERCE** website.

Web Developer, Law Experts LLP, Bareilly

JANUARY 2022 – MARCH 2023

- Played a vital role for developing and learning new technologies such as **PHP**, **SQL**, **MongoDB** for creating backend. Got expertise in creating a attractive and responsive web pages.
- Created a **Login system** for the upcoming customers getting their details and credentials for authorization using **PHP**, **MongoDB**.

Web developer, LM Softech, Bareilly

NOVEMBER 2021 – JANUARY 2022

- Learned new things about the industry and languages like **HTML**, **CSS**, **Javascript** and **Bootstrap** for building the frontend parts of the web pages.
- Created a attractive web page using these techniques. Got knowledge and expertise in Creating a attractive and responsive website using **CSS Media Query** and **Bootstrap**.
